2. **Introduction to General Rules & Regulations:**

The General Rules and Regulations provided herein govern the conduct of On-line Reverse Auctions operated by Antares systems Ltd. These rules cover the roles and responsibilities of the parties in the On-line Reverse Auctions on the Antares platform. **Acceptance in-toto to these General Rules and Regulations is a prerequisite for securing participation in the On-line Reverse Auctions on the Antares platform (www.tenderwizard.com/GRSE)**

3. **Role of Service Provider**

Antares is the agency (operator) primarily providing the platform for conducting the Reverse Auction. As the agency providing the auction engine, the role of Antares would include:

- Setup the auction based on item details and bidding rules as mentioned in tender document.
- Providing access through user-id protected by password to the approved bidders to participate in the auction.
- **Enhancing bidder awareness by providing them the details / steps of auction process to enable them participate in Reverse Auction and comfort with the auction mechanism and bidding rules.**
- Summarizing auction proceedings and communicating of the outcome to GRSE.

4. **Role of the Bidder/Tenderer**

The role of the bidders/vendors is outlined below:

- Give written consent to General Rules and Regulations. Access to auction mechanism shall be provided only after such consent.

- Ensure that user-id and password to access the auction is not revealed to unauthorized persons.
- Participate in the Reverse Auction with the aim of bidding to secure the auctioned item in the auction (being selected for supplying GRSE's requirement in a Reverse Auction).
- Convey/confirm last quoted price in writing to SP, immediately after close of Reverse Auction.
- Provide breakup of last quoted price (if required) within stipulated time as mentioned in tender document or otherwise communicated.
- In the event of winning an allotment, fulfill all obligations under the contract.

5. **Bidding Rules:**

The Bidding Rules refer to the information and terms defined specifically for a particular Reverse Auction. The purpose of the Bidding rules is to provide approved bidder with the information and terms specific to the auction in which they are bidding. This would include:

- Start Time and duration of the Reverse Auction
- Any extension of the duration of the auction in the event of bids being received towards the end of the pre-specified duration
- Start Bid Price (if specified)
- Minimum & Maximum Bidding Quantity (if specified)
- Price Decrements and any reduction in the price decrements in the auction in the event of inactivity
- Other attributes (informational/non-negotiable in nature)

Participation in the auction process presumes complete awareness and understanding of the bidding rules.

6. **Conduct of the Reverse Auction**

The Reverse Auction shall be conducted on pre-specified date & time.

Antares retains the right to cancel or reschedule the Reverse Auction on any of the followings reasons:

- Some of the confirmed bidders are unable to access the module due to infrastructure problems such as sustained power failure or telecommunication breakdown.
- Bids are received but above the Start Bid Price

The duration of the Reverse Auction may also vary from the pre-specified period of time on account of termination of the auction by Antares:

- On the advice of the GRSE, or,
- On its own accord in case of situations where it is felt that continuance of the auction proceedings is prejudicial to the smooth conduct and / or integrity of the auction process.

7. **Problems during the conduct of the Reverse Auction**

In the event of any problems being faced in the smooth conduct of the auction, Antares shall have the right to undertake one or more of the following steps:

- Cancellation of a bid
- Locking of bidders account (suspension of operations in the account) etc. Such intervention may even happen without seeking prior concurrence of GRSE.

Thereafter, Antares shall inform GRSE, clearly stating reasons, of such cancellation / suspension.

8. **Ensuring Participation & Loss of connectivity**

The bidders has to participate in the Reverse Auction (RA) from their own office/ own arrangement. The bidder has to make arrangement for ensuring Internet connectivity throughout the RA event. For this, the bidder shall be solely and exclusively responsible for ensuring continuance of

connectivity. GRSE & Antares shall in no way be responsible for the consequences arising out of disruption of Internet connectivity. In case the bidder desires, efforts will be made to provide assistance during the Reverse Auction phase by deploying skilled persons from Service provider/authorized representative at the participating vendor locations. However, GRSE or Service provider shall in no way be responsible ensuring Internet connectivity.

8. Liability of Service Provider:

Antares shall not be liable to the GRSE / bidders in the auction or any other person(s) for:

- any breach of contract by any party in the fulfillment of the underlying contract.
- Any delays in initiating the online auction or postponement / cancellation of the online auction proceedings due to any problem with the hardware / software / infra structural facilities or any other shortcomings at the vendors' end.

9. Confidentiality Clause:

Antares undertakes to handle any sensitive information provided by GRSE or confirmed bidders for the Reverse Auctions conducted on the Antares platform with utmost trust and confidentiality.

10. Jurisdiction:

Any disputes relating to the online Reverse Auction module shall be subject to the sole jurisdiction of the district court of the GRSE.

11. Right of GRSE:

GRSE reserves the right to fully / partly accept or reject any or all bids placed in the online Reverse Auction without assigning any reason whatsoever. GRSE also reserves the right to allot the tendered quantity to one or more bidders.

Definition of Key Terms for Reverse Auction

1. **Reverse Auction:** Reverse Auction refers to a forum where the requirement for one/more Lots of an item is stated and the participants are required to bid down the price to be selected to supply the requirement.
2. **On-line Reverse Auction:** On-line Reverse Auctions refer to those Reverse Auctions conducted through the Internet with simultaneous bidding (from one or more locations). In other words, the venue for the auction is on an Internet website/ platform. The Antares website (<http://www.tenderwizard.com/GRSE>) or any other URL assigned by Antares would constitute the venue for the purpose of the On-line auction.
3. **Award at the Reverse Auction:** The bidder quoting the lowest price is normally allotted the item unless otherwise specified by GRSE.
4. **Buyer i.e. GRSE:** GRSE is the individual/business entity who has contracted Antares to conduct such Reverse Auction. In case of Reverse Auction, the purpose would be to meet their requirement for item/s from among the sellers desiring to sell the items to GRSE.
5. **Bidder:** Bidder is the individual/business entity participating in the Reverse Auction, intending to supply the item/s to GRSE. To become a Bidder in the auction, a business entity has to secure GRSE's approval for participation and also provide written consent to the General Rules and Regulations for RA.
6. **Auction Engine:** Auction Engine refers to the software that encapsulates the entire auction environment, processing logic and information flows. Antares is the sole owner of the auction engine and retains exclusive right over the utilization of the same.
7. **Preview Time:** Preview Time refers to the period of time that is provided prior to the commencement of bidding. This is to facilitate approved participants to view the auction details such as item specifications, bidding details and bidding rules. The purpose is also to familiarize participants with the functionalities and screens of the auction mechanism. It is not mandatory for Antares to provide Preview Time.
8. **Start Time:** Start time refers to the time of commencement of the conduct of the On-line auction. It signals the commencement of the Price Discovery process through competitive bidding.

9. **Duration of the Reverse Auction:** It refers to the length of time the price discovery process is allowed to continue by accepting bids from competing bidders. The duration of the auction would normally be for a pre-specified period of time. However, the bidding rules may state the conditions when the pre-specified duration may be extended/ curtailed. The conditions include:
- Curtailment of auction duration in the event of no bids for a specified period of time (Inactivity Time)
 - Automatic extension in the event of bids being entered towards the end of the scheduled duration to facilitate the other bidders to view and react to the bid.
10. **Auto Extension of the Auction Timings:** In the event of bids in the last few minutes of the scheduled bid time, the Bid Timings are automatically extended for a specified period from each such bid. Such Auto Extension shall continue until no bids are placed for the specified period (Engine remains inactive for the specified period). The Inactivity Time for Auto Extension purpose is normally 5 minutes. Antares however retains the right to change the same. The Inactivity time applicable for the particular On-line Bid shall be communicated to the bidder if it will be set to a value less than 5 minutes.
11. **End of the Reverse Auction:** End of the Auction refers to the termination of the auction proceedings signaling an end to the price discovery process.
12. **ID and Pass Word:** Pass Word and ID shall be given to all the eligible Vendors by the Service Provider for enabling them to participate in the Reverse Auction.
13. **Start Bid Price:** Wherever indicated, Start Bid Price is the Maximum Price, which will be accepted by the Reverse Auction engine. Supplier will have to quote a price lesser than the Start Bid Price for participating in the Reverse Auction. The computer shall not accept Price higher than Start Bid Price for a lot. Bidding will start at start Bid Price to be Intimated in advance to the vendors eligible for bidding. This will be put up on the site.
14. **Minimum Decrement:** Minimum decrement is the minimum amount by which, a supplier has to reduce his bid value in order to beat the latest lowest bid. For example if a bidder bids Rs 10,00,000/- for a Lot, others, in order to beat this bid, have to quote a lower price with a minimum decrement say of Rs 2,500/- i.e. in order to be eligible they have to quote Rs. 9,97,500/- (or lower) for the same Lot. This minimum decrement shall be pre-decided by GRSE/Antares and will be in-built into the RA event.
15. **Proxy Bid** is a bidding option through which, the system places bids on bidder's behalf. Bidder need to check (click) the proxy bid box on the screen and place the lowest value to which they can bid and then place submit button and confirm. Once the proxy is activated the bids are placed automatically as per the minimum decrements. The lowest value of the proxy bid amount is not visible by any other bidder.

When a bidder exercises the proxy option, the proxy bid remains L1 till the lower bid value fed in the auction machine is exhausted i.e. a lower bid, less than the lower bid value offered by the bidder exercising the proxy, is offered by another bidder. If a bidder bids a price equal to the lower limit of the proxy bid, the proxy bidder gets precedence over him at that price.

Example: Suppose, the current bid in the market is Rs.10000 and the min. decrement is Rs.100 and a bidder have activated proxy till Rs.9500. Now say a bidder places a bid of Rs.9800, the system automatically bids Rs.9700 on the proxy bidder's behalf at the same time and keeps the proxy bidder as a leading bidder.

In the following circumstances, a bidder may opt for proxy bidding.

1. Where the bidder is not confident of a reliable Internet Connectivity
2. Where the speed of Internet Connection is slow and unable to catch-up with the speed of competitor's bids
3. To remain a leading bidder till the lowest bid value fed in the auction machine.
4. Where the bidder is required to put bids in more than one Market/Lot at a time
5. Bidder is pre-occupied and not in a position to put bids live as the auction is going on.

The following declaration has to be submitted by the bidders within 2 hrs. from the date & time of reverse auction.
